

waste connect

Company presentation

ABOUT US

- ▶ **Waste Connect** was founded by a group of entrepreneurs in the **environmental field**, sincerely concerned for the environment which surrounds us.
According to our **vision**, business doesn't mean exclusively "profit", without caring for the **nature** and its resources.
- ▶ We would like to give our contribution, however little, to enhance the **collective welfare** through our activities, choosing **modern** and **smart systems** - that's our mission!
- ▶ Our enterprise system: **innovative technologies**, exploiting **synergies**, an **international network** of companies.
- ▶ We at Waste Connect would like to involve you in our project, of thinking today about our tomorrow!

WE CLOSE THE CYCLE!

OUR BENEFITS

- ▶ Technical Advising
- ▶ Landfill Mining
- ▶ Project Funding
- ▶ Trading

TECHNICAL ADVISING

Waste Connect is always looking for **smart** and **innovative solutions** on the **international market**.

Thanks to our network, we can help you build or improve your plant in order to reach higher sustainability, safety, competitiveness and compliance to your needs.

We choose technologies that privilege **material** and **energy recovery**.

Summing up, we would assist you:

- ▶ with the **construction** of a new plant or the **updating** of an existing plant with the aim to **recover material or energy**
- ▶ with the construction of a new **biogas plant** or the updating of an existing biogas plant
- ▶ with the realization of projects that integrate **fuel cell – hydrogen** based technology for energetic infrastructures and **e-mobility**
- ▶ by choosing temporary **mobile treatment plants** in order to treat the waste **on site**

LANDFILL MINING

- ▶ Waste Connect is active in the **remediation** of used-to-capacity **landfills**. We manage **projects** for **Landfill Mining** to **recover secondary raw materials** and **restore** the affected areas.
- ▶ Landfill Mining (LFM) is defined as “**the safe exploration, conditioning, excavation and integrated valorisation** of (historic, present and/or future) landfilled waste streams as both **materials (Waste-to-Material)** and **energy (Waste-to-Energy)**, using innovative transformation technologies and respecting the most stringent social and ecological criteria.”
- ▶ LFM is part of a wider view of a circular economy and is perfectly complementary to urban mining and **recycling** in general.
- ▶ Furthermore, Waste Connect looks after potential **EU funds** in order to support projects of this type.

PROJECT FUNDING

Waste Connect is your **partner for the environment**.

We support you during the necessary **funding process of your projects**. Waste Connect assists you to **access EU funding** in order to **boost the development** in several fields such as:

- ▶ Implementation of **innovative technologies** for the recovery of materials and **energy deriving from waste**
- ▶ **Recovery** of used-to-capacity landfills using the technology of **Landfill Mining**
- ▶ Realization of projects that integrate **fuel cell – hydrogen** technology for **energetic infrastructures** and **e-mobility**

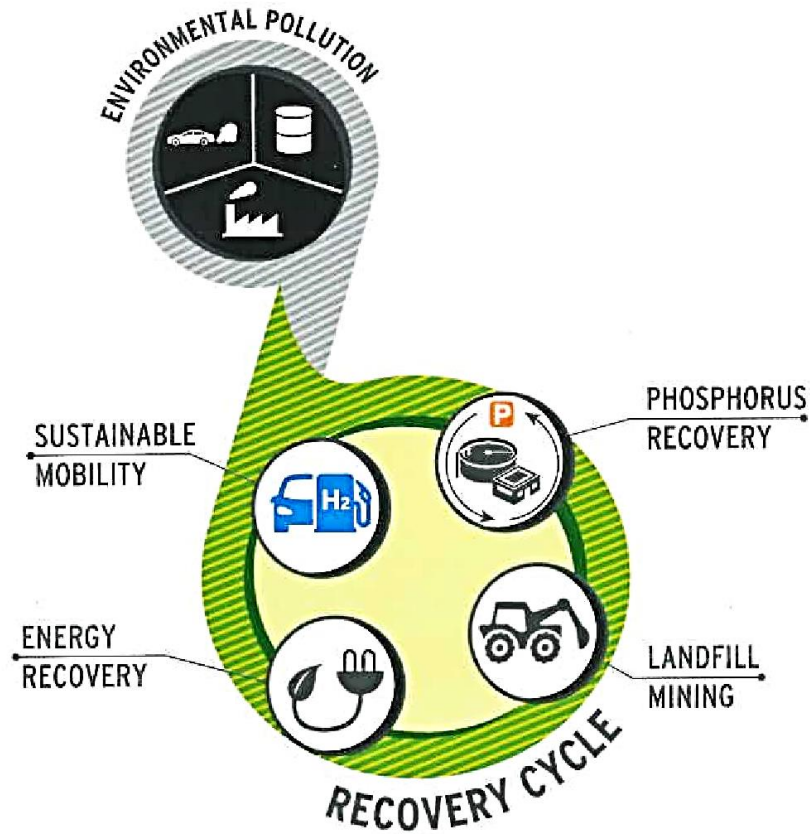

TRADING

- ▶ Waste Connect is registered in the **Italian Albo Nazionale Gestori Ambientali** under category 8.
- ▶ We offer a service of **waste brokerage** for **industrial waste** coming from **Italy**.
- ▶ Waste Connect assists you during the **notification** process, offering you a vast **network of European** up-to-date **plants**, innovative technologies and **tailor-made services** following the principles of **circular economy**.
- ▶ Our scope is getting satisfied customers and reaching collective welfare.

WE CLOSE THE CYCLE!
